Office Action Summary	Application No. 10/680,390	Applicant(s) CHAYEN, NAOMI E.	
	Examiner Felisa C. Hiteshew	Art Unit 1722	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Specification

1. Claim 5 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 1 and 3 in which claim 3 is dependent upon claim 1. See MPEP § 608.01(n). Accordingly, the claim 5 has not been further treated on the merits.

Claim Rejections - 35 USC § 112

1. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 uses a method dependent upon a method of another claim. The claims language is redundant. Please clarify the proper claim language.

2. Claim 32 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 33-39 are rejected under 35 U.S.C. 112, second paragraph, as being "indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The use of trademark or trade names was found to be indefinite". *Ex parte Kattwinkel* 12 USPQ 11 (BPAI 1931).

Claims 33-39 are being considered vague and indefinite in that they are not further limiting in the claim language. "Generally a claim will be definite where each recited limitation is definite. In re *Wakefield* 164 USPQ 636. (CCPA 1970).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-4,6-9, 12,14-17, and 40-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stevens.

Stevens teaches a method for automatically crystallizing proteins, wherein it specifically teaches microbatch and sitting or hanging drop vapor diffusion. An automatically liquid dispensing station uses two robotic crystallization systems with an immersion oil to cover over the macromolecule.

D'Arcy, et al further teaches a similar method for crystallizing proteins and other biological macromolecules under paraffin oil-containing silicon utilizing various volumetric samples.

The difference being Stevens and D'Arcy, et al does not exactly teach a gel-forming component to be crystallized. However, in absence of unobvious results, it would have been obvious to one of ordinary skill in the art to modify and optimize the process parameter limitation in order to ensure proper orientation.

A reference is good not only for what it teaches by direct anticipation but also for what one of ordinary skill might reasonably infer from the teachings. Expected beneficial results are evidence of obviousness, just as unexpected beneficial results are evidence of unobviousness. In re Novak 16 USPQ 2d 2041 (Fed. Cir., BPAI 1989); In re Hoffman 194 USPQ 126 (CCPA 1977); In re Skoll 187 USPQ 481 (CCPA 1975); In re Skoner 186 USPQ 80 (CCPA 1975); In re Garshon 152 USPQ 602 (CCPA 1967).
